Trusted in More Homes Than Any Other Brand

Willis Carrier invented air conditioning in 1902. Over 100 years later, Carrier systems are trusted in more homes than any other brand. Carrier continues to be on the forefront of leading-edge technology and unsurpassed standards of excellence with advanced features such as Puron® refrigerant, Comfort Heat Technology®, Ideal Humidity System® technology and the Infinity® system. Carrier's scientists, engineers and dealers strive to provide homeowners with the most advanced indoor comfort solutions available.

- Carrier has one of the most extensive product-testing facilities in the world to ensure one of the lowest failure rates in the industry.
- Carrier maintains one of the industry's toughest reliability testing standards to be sure that every product will provide trusted indoor comfort and performance for years.
- During the design phase, hand-built prototypes are tested to maximize performance levels.
- Production-line test stations provide quality control during assembly. Then, a bank of computers test each product to ensure performance.

turn to the experts™ 

The Components of a Complete Heating and Cooling System

Humidifier replenishes moisture to dry air.

Evaporator coil allows the refrigerant to absorb heat from the air as it passes over the coil surface. The evaporator coil is located with the indoor unit and is also referred to as the indoor coil.

Ultraviolet germicidal lamp inhibits the growth of contaminants on the indoor coil, leaving your home with cleaner, fresher indoor air.

Furnace provides reliable, high-efficiency heating for long-lasting comfort and energy savings. Available in high-efficiency models for both gas- and oil-based fuel sources.

Air cleaner improves air quality by removing harmful and irritating airborne pollutants from your home.

Air conditioner provides reliable, high-efficiency cooling for long-lasting comfort and energy savings. Ask about environmentally sound Carrier air conditioners with Puron® refrigerant.

Infinity® control is the interface to the Infinity® system. The Infinity system is the only system in the industry that allows you to control temperature, humidity, air quality, fan speed and ventilation.

Ventilator combines fresh outdoor air with conditioned indoor air for improved air quality and maximum efficiency – great for today's tightly constructed home.

Zoning sets different temperatures for up to eight different areas of your home for truly customized comfort and enhanced utility savings.

Heat pump provides reliable, high-efficiency heating and cooling for long-lasting comfort and energy savings.

Fan coil is the indoor section of your heat pump system. It should be properly matched to the outdoor unit for improved efficiency and long-term reliability.

Matching components provide optimum comfort, efficiency and performance.

- Infinity system by Carrier is our most advanced system, connecting the best components for the ultimate home comfort control.
- Forced-air systems are usually built around an indoor unit, such as a furnace or a fan coil.
- The outdoor unit, an air conditioner or heat pump, is matched with a furnace or fan coil for year-round comfort.
- Air quality is greatly enhanced with the addition of an air cleaner, humidifier and a ventilator.
- Precise temperature control comes from a Carrier thermostat which is matched to your specific system.
- Zoning provides the ultimate control for true custom comfort.

1. Efficiency

Efficiency ratings are like gas mileage – the higher the rating, the more efficient the product. All products are given the following ratings, so you'll know exactly what to expect from your investment.

AFUE

(Annual Fuel Utilization Efficiency)

This measurement gauges heating fuel usage. The Infinity® 98 gas furnace receives up to 97.4% AFUE.

HSPF

(Heating Seasonal Performance Factor)

This measurement gauges the heating mode of heat pumps. Most new units have ratings from 7.0 to 9.4. The Infinity® 20 heat pump receives up to 13.0 HSPF.

SEER

(Seasonal Energy Efficiency Ratio)

This measurement gauges air conditioning cooling. All new models are required to have at least a 13.0 SEER rating. The Infinity® 21 air conditioner receives up to 21.0 SEER.

ENERGY STAR®

Carrier Corporation has determined that certain products meet ENERGY STAR guidelines for energy efficiency. Look for this logo on our Infinity® and Performance™ series products.

2. Refrigerant

Freon®-22* Refrigerant

Since its debut in 1930, Freon refrigerant has been used in cooling systems. And while it's still available, the Clean Air Act of 1990 prohibits the production of Freon-22-based air conditioners and heat pumps by 2010, and Freon-22 production by 2020. As Freon-22 production declines, its cost is predicted to rise.

Puron® Refrigerant

Carrier was the first to introduce a new, non-ozone-depleting refrigerant called Puron refrigerant – a full six years ahead of the competition – paving the way for the future. Puron refrigerant is chlorine-free, so it doesn't damage the Earth's ozone layer. And, as other refrigerants become less available, Puron refrigerant will be the refrigerant of choice for years to come.

* Freon is a registered trademark of E. I. DuPont de Nemours & Co.

3. Comfort

Carrier specializes in creating a customized home comfort system with our broad selection of heating and cooling products. Your Carrier® dealer can help you choose the best system for your home including Carrier-exclusive features that further enhance your indoor environment.

Greenspeed™ Intelligence

Greenspeed™ intelligence is our unmatched technology that takes into account your complete comfort, from degrees to dollars to decibels. It marries adaptable-speed technology with Infinity intelligence to provide up to 97.4% gas efficiency, tight temperature control and quiet operation. It delivers precise comfort, constantly matching to the heating demands of the home. This translates into reduced energy use and reduced temperature swings throughout the home.

Comfort Heat Technology® Feature

The Comfort Heat Technology feature accurately predicts the need for heating while cutting temperature swings in half, and provides a nearly continuous flow of warmth in low-capacity operation for a steadier, more consistent indoor temperature.

Infinity® System

When a heat pump or air conditioner and Carrier humidifier are combined with a variable-speed furnace or fan coil, the revolutionary Infinity system is the only system in the industry that allows you to control temperature, humidity, air quality, fan speed and ventilation. It even detects when your air filter needs replacing. It's so advanced it automatically adjusts to your systems' needs for peak efficiency and performance. It's the ultimate control center for all of your home system components.

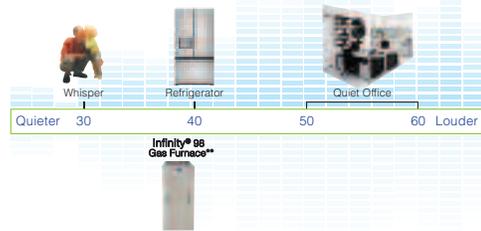

Ideal Humidity System® Technology

Ideal Humidity System technology automatically adds or removes just the right amount of moisture to keep your home comfortable. Ideal Humidity System technology can help you save on energy costs, too. When the humidity is right, you can feel comfortable at higher temperatures in the summer and lower temperatures in the winter.

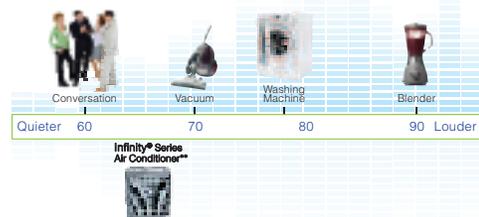

4. Sound

Home comfort shouldn't come at your ears' expense. That's why quiet is built right into every system. Carrier furnaces feature the QuietTech™ noise reduction system that provides comfortable heat while generating very little noise in the process.

Carrier manufactures gas furnaces that are among the quietest in the industry. We test our products in a sound laboratory specifically built to resemble a typical residence. Sound level recordings produced at steady state, low fire operation (the most common operating condition), measured 3 feet from furnace. Other sound levels, mentioned for comparison, as published at <http://www.nidcd.nih.gov/health/hearing/ruler.asp>.

Carrier air conditioners are also quiet, thanks to the exclusive Silencer™ System that ensures extra-quiet performance by maximizing airflow while minimizing vibration.

** Per standard testing as described by ARI 270-95. Other sound levels, mentioned for comparison, as published at http://www.nidcd.nih.gov/health/education/teachers/common_sounds.asp.

5. HYBRID HEAT® Dual Fuel Systems

With both a heat pump and a furnace, Carrier's HYBRID HEAT dual fuel system will keep you comfortable throughout every season. The heat pump is designed to work like an air conditioner during the warmer months, transferring heat from inside your home and sending it outside. As the seasons change, the heat pump reverses this process by extracting heat from outdoor air and moving it into your home. By combining an electric heat pump and a gas furnace, our HYBRID HEAT dual fuel system delivers big comfort while using less energy. Ask your dealer if a HYBRID HEAT dual fuel system is right for you.

Carrier® Infinity® Series Air Conditioners: Innovation, Advanced Technology and Lasting Comfort.

Puron® refrigerant – environmentally sound and won't deplete the ozone layer.

- 1 **Scroll compressor** – the heart of the air conditioner, the compressor pumps refrigerant through the system.
- 2 **Infinity® electronic control board** – allows precise control of two-stage operation and works with the Infinity® control for the ultimate in comfort. “Smart” electronics track previous cycles and automatically select the best settings for maximum comfort and efficiency.
- 3 **Copper Microtube™ tube/aluminum fin coil** – transfers heat outside to maximize indoor cooling while resisting corrosion.

- 4 **Carrier's exclusive Silencer System II™** – helps deliver quieter operation by optimizing airflow, minimizing vibration, and using sound-absorbing materials. The five key components include:
 - a. **Silencer top**
 - b. **Integrated fan motor and forward-swept fan blade**
 - c. **Compressor vibration isolator plate**
 - d. **Sound hood**
 - e. **Split-post compressor grommets**
- 5 **High- and low-pressure switches** – protect the system by shutting it off when harmful conditions are detected.
- 6 **Filter drier** – constantly filters the refrigerant to remove moisture or contaminants that can damage your system.
- 7 **WeatherArmor Ultra™ protection package** – combines three design elements that protect your comfort.
 - a. **Galvanized steel cabinet**
 - b. **Louvered coil guard**
 - c. **Baked-on powder paint**

Infinity® 21

INFINITY® SERIES

Infinity® 21

- Highest energy efficiency – up to 21.0 SEER
- Environmentally sound Puron® refrigerant
- Two-stage capability – operates on low-speed 80% of the time for energy savings and even temperatures
- Quiet operation with Carrier's Silencer System II™ – sound ratings as low as 66 dB
- Protected by Carrier's WeatherArmor Ultra™ coil guard
- Superior comfort and humidity control
- Infinity® control board for ultimate comfort
- Improved indoor air quality – system tells you when to change your furnace filter
- System diagnostics keep an eye on your investment and keep repair bills in check

Performance SERIES

Performance™ 17

- High energy efficiency – up to 18.0 SEER
- Environmentally sound Puron® refrigerant
- Two-stage capability – operates on low-speed 80% of the time for energy savings and even temperatures
- Protected by Carrier's WeatherArmor Ultra™ coil guard
- Compatible with the Infinity® system for increased comfort and ease of use
- Sound ratings as low as 73 dB

Comfort SERIES

Comfort™ 17

- High energy efficiency – up to 16.5 SEER
- Environmentally sound Puron® refrigerant
- Protected by Carrier's WeatherArmor™ coil guard
- Sound ratings as low as 76 dB

Carrier Gas Furnaces

Infinity® 98

- Infinity® ICS high energy efficiency – up to 97.4% AFUE
- Infinity® 80 high energy efficiency – 80% AFUE
- Infinity® control boards keep track of previous cycles and allow the system to automatically adjust the heating and cooling stages for the best comfort and energy efficiency
- Variable-speed blower allows unit to operate at lower speeds the majority of the time, ensuring consistent airflow and temperature
- Infinity 98 provides multi-stage heating

Infinity® 80

Performance™ 96

- Performance™ 96 high energy efficiency – up to 96.7% AFUE
- Performance™ 80 high energy efficiency – 80% AFUE
- Two-stage heating – low-speed allows for ultra-quiet operation and maximum comfort
- Performance 96 variable-speed blower allows unit to operate at lower speeds the majority of the time, ensuring consistent airflow and temperature
- Performance 80 Comfort Heat Technology®
 - Temperature stays closer to thermostat set point
 - Improved dehumidification
 - Sealed combustion design reduces burner sound
- Improved humidity control

Performance™ 80

Comfort™ 95

- Comfort™ 95 high energy efficiency – 95% AFUE
- Comfort™ 80 high energy efficiency – 80% AFUE

Comfort™ 80

Maximize Your Comfort with a Carrier® Infinity® Gas Furnace With IdealComfort™ Technology.

- 1 Burner ignition** – as one of the most robust and durable ignition systems available, Power Heat™ hot surface ignition replaces pilot lights and reduces utility consumption.
- 2 Modulating-stage gas valve** – provides multiple heating capacities. The low capacity works during milder days while the high capacity engages during colder temperatures.
- 3 Variable-speed inducer** – precisely controls air intake within the combustion system for high-efficiency performance.
- 4 Variable-speed blower** – ensures consistent airflow and temperature maintenance, helping to keep rooms more comfortable while improving air quality.
- 5 Two heat exchangers** – are vital to your comfort and the efficiency of your furnace because they extract heat from the gas used. The Infinity 98 uses two heat exchangers to optimize efficiency. Our primary heat exchanger does most of the work. Then, our secondary heat exchanger pulls additional heating energy from operation to maximize efficiency and provide soothing comfort.
- 6 Infinity® furnace control board** – allows the unit to connect to an Infinity® control for the ultimate comfort control. Smart electronics keep track of previous cycles and allow the system to automatically adjust the heating and cooling stages for the best comfort and energy efficiency.

Infinity® 98

Carrier® Heat Pumps Designed for Tomorrow's Needs Today.

Puron® refrigerant – environmentally sound and won't deplete the ozone layer.

1 Scroll compressor – the heart of the heat pump, the compressor pumps refrigerant through the system.

2 Inverter-driven variable-speed operation – delivers unprecedented heat pump efficiency of up to 13.0 HSPF.

3 Copper Microtube™/Aluminum fin coil – transfers heat outside to maximize indoor cooling while resisting corrosion.

4 Infinity® control board – allows the unit to connect to the Infinity® control for the ultimate comfort control. You control comfort schedules, heating, cooling, humidification, dehumidification, fan speed and much more all from one easy-to-use control on the wall in your home.

5 WeatherArmor Ultra™ protection – combines three design elements that protect your comfort.

a. Galvanized steel cabinet

b. Louvered coil guard

c. Baked-on powder paint

6 Filter drier – constantly filters the refrigerant to remove moisture or other contaminants that can harm your system.

7 Carrier's exclusive Silencer System II™ – helps deliver quieter operation by optimizing airflow, minimizing vibration, and using sound-absorbing materials. The five key components include:

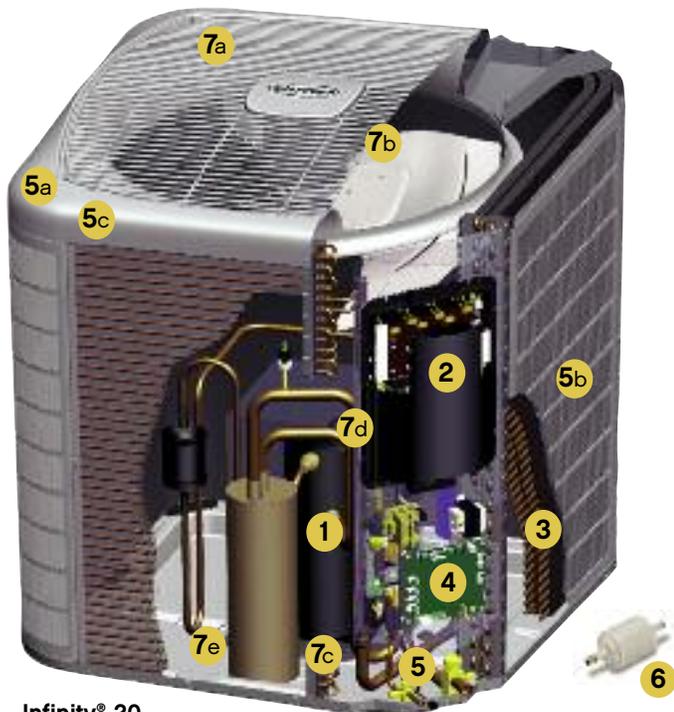

a. Silencer top

b. Integrated fan motor and forward-swept fan blade

c. Compressor vibration isolator plate

d. Sound hood

e. Split-post compressor grommets

Infinity® 20

INFINITY® SERIES

Infinity® 20

- High energy efficiency – up to 20.0 SEER and 13.0 HSPF
- Environmentally sound Puron® refrigerant
- Variable-speed operation with Greenspeed™ intelligence
- Quiet operation with Carrier's Silencer System II™ – sound ratings as low as 62 dB
- Protected by Carrier's WeatherArmor Ultra™ coil guard
- Superior comfort and humidity control
- Infinity® control board for ultimate comfort
- Improved indoor air quality
- Self-diagnostics

Performance® SERIES

Performance™ 16

- High energy efficiency – up to 16.5 SEER and 9.5 HSPF
- Environmentally sound Puron® refrigerant
- Two-stage capability – operates on low-speed 80% of the time
- Protected by Carrier's WeatherArmor Ultra™ coil guard
- Sound ratings as low as 70 dB

Comfort® SERIES

Comfort™ 15

- High energy efficiency – up to 15.0 SEER
- Environmentally sound Puron® refrigerant
- Protected by Carrier's WeatherArmor™ coil guard
- Sound ratings as low as 69 dB

Carrier Fan Coils

Infinity® Series

- Variable-speed model offers:
 - Maximum energy efficiency enhances cooling efficiency up to two SEER points, with estimated cooling cost savings of up to 16% and heating cost savings of up to 10%
 - Increased comfort with warmer heating temperatures than standard heat pump systems
 - Improved humidity control and enhanced indoor air quality
- Infinity® control boards keep track of previous cycles and allow the system to automatically adjust the heating and cooling stages for the best comfort and energy efficiency
- Designed to match with environmentally sound Puron® refrigerant
- Equipped with a Thermal Expansion Valve (TXV)

Performance™ Series

- Variable-speed model offers:
 - Maximum energy efficiency enhances cooling efficiency up to two SEER points, with estimated cooling cost savings of up to 16% and heating cost savings of up to 10%
 - Increased comfort with warmer heating temperatures than standard heat pump systems
 - Improved humidity control and enhanced indoor air quality
- Fixed-speed model is energy-efficient with savings of 2% to 3% in cooling costs
- Designed to work with environmentally sound Puron® refrigerant
- Equipped with a Thermal Expansion Valve (TXV)

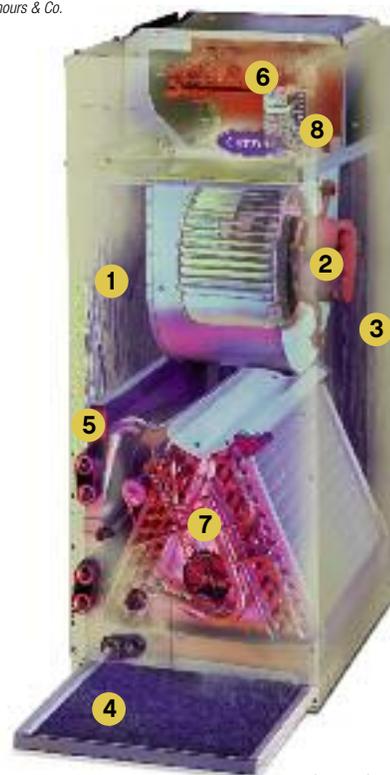

Comfort™ Series

- Variable-speed model offers:
 - Maximum energy efficiency enhances cooling efficiency up to two SEER points, with estimated cooling cost savings of up to 16% and heating cost savings of up to 10%
 - Increased comfort with warmer heating temperatures than standard heat pump systems
 - Improved humidity control and enhanced indoor air quality
- Fixed-speed model is energy-efficient with savings of 2% to 3% in cooling costs

Improve SEER Ratings by up to Two Full Points with a Carrier® Fan Coil.

- 1 Foil-faced insulation** – helps isolate sound, reduces bacterial growth and features an easy-to-clean surface.
- 2 ECM variable-speed motor and easy-select board** – increases system efficiency up to two full SEER points while using as little as 40 watts to operate. They combine to generate noticeably warmer air during the heating season than a standard heat pump system. Add the Infinity® control to your Infinity® fan coil and remove up to 30 times more humidity from the air than with a standard fan coil to increase your home comfort during the summer months.
- 3 Airtight cabinets** – keep air inside and direct it within your ductwork for greater efficiency.
- 4 Permanent washable filter** – can be cleaned and reinstalled for economic air filtration.
- 5 Enhanced drain pan design** – allows complete drainage to improve indoor air quality.
- 6 Electric resistance heaters** – maintain heat consistency during extremely cold temperatures.
- 7 Thermal expansion valve** – precisely controls refrigerant distribution for improved comfort and cost-savings.
- 8 Infinity® control board** – allows the fan coil to connect to the Infinity control for the ultimate comfort control. Smart electronics keep track of previous cycles and allow the system to automatically adjust the heating and cooling stages for the best comfort and energy efficiency.

Infinity® Control

Infinity Control: The Ultimate Control Center for All of Your Heating and Cooling Systems

• One control

Adjusts a furnace or fan coil, air conditioner or heat pump as well as controls optional accessories such as zoning, humidifiers, ultraviolet lights and filtration products.

• View your system performance

At the touch of a button, 24-hours-a-day, seven-days-a-week. View your system's performance at-a-glance with the industry's largest, easy-to-read LCD screen.

• Optional Remote Access Kit

Check your system from the internet or via telephone for convenient temperature adjustments and system status checks.

• TrueSense™ dirty filter detection

Reminds you when it's time to change your media filter. And when you add a humidifier, germicidal UV lamps or ventilators, the Infinity control also reminds you for their routine maintenance.

Infinity® Remote Access

Infinity Remote Access

The Carrier® Infinity remote access gives you unprecedented control of your comfort system and allows you to change your settings from anywhere in the world.

You will be able to access your Infinity® system with Internet or telephone access. Log onto the website or call into the 1-800 number and you will be able to communicate with your Infinity system.

(No rebate available.)

Carrier Zoning Systems

Customize your indoor comfort with flexible temperature programming in different parts of the house. Your Carrier dealer will work with you to help you decide how to best zone your home for optimum comfort and efficiency.

- Eliminate hot and cold spots
- Maximize energy savings
- Customize up to eight zones

Performance™ and Comfort™ Series Thermostats

Carrier programmable thermostats combine advanced technology, user-friendly controls and designer appearance, along with the features you need to control the air inside your home...from heating and cooling to humidity levels.

The programmable Performance™ series line includes the following features:

- Temperature and humidity control
- Dehumidification
- HYBRID HEAT® dual fuel system compatible
- Seven-day programmable, up to four time periods per day, temporary or permanent hold
- Exclusive door color options (sold separately)
- Exclusive ExP® technology (sold separately)
- Ultrathin at .8" thick
- ENERGY STAR® compliant

Carrier non-programmable thermostats combine advanced technology, user-friendly controls, and designer appearance. The Performance™ series non-programmable line includes the following features:

- Temperature and humidity control
- Dehumidification
- HYBRID HEAT® dual fuel system compatible
- Touch 'n' Go temperature presets

Comfort™ Series Programmable Thermostat

Features include:

- Large easy-to-read display
- Five two-day programmable, up to four time periods per day
- Touch 'n' Go™ temperature presets
- Dual-powered – batteries or system powered
- Continuous backlight configurable

Comfort™ Series Non-Programmable Thermostat

Features include:

- Large easy-to-read display
- Dual-powered – batteries or system powered
- Continuous backlight configurable

Carrier® Air Purifiers

**Infinity Air Purifier
Model GAPA**

The Infinity air purifier combines superior filtration efficiency with pathogen-killing technology to deliver maximum air purification.

- Ultra high filtration efficiency equivalent to MERV 15
- Captures and kills airborne viruses, bacteria and mold spores
- Easy to replace media cartridge
- State-of-the-art, exclusive technology
- Cabinet supports up to 400 lbs.

**Air Filter with Cabinet
Model PGAPA**

Performance™ Series Humidifiers

A Carrier® humidifier evenly distributes moisture throughout your home to help with irritated sinuses, noses or throats; itchy skin; static electricity; cracked woodwork, wallpaper, and paint; and other problems associated with dry, heated air. The humidifier will even help you save money on your energy bills since humidified air actually feels warmer than dry air – so your thermostat can be set at a lower temperature!

Model LFP

Performance™ Series UV Lights

Ultraviolet light exposure inhibits the growth of contaminants at their source.

- Minimizes dust and dirt accumulation on coils
- Reduces airborne particles
- Improves system efficiency
- Five-year limited warranty

**Ultraviolet
Germicidal Light**

Performance™ Series Ventilators

Today's tightly constructed homes can trap stale air inside your home, creating higher dust and humidity levels. Performance™ Heat Recovery Ventilators (HRV) and Energy Recovery Ventilators (ERV) help keep fresh air circulating through your home for improved air-quality comfort year-round.

Save up to \$1,250[†] on a Carrier heating and cooling system. You'll get efficiency, reliability and savings!
Cool Cash offer valid September 1, 2011 – November 15, 2011 from participating dealers only.
Installations must be completed by November 30, 2011.
Rebate claims must be submitted by December 15, 2011.

[†] Rebates paid on qualifying products. System rebates range from \$0 to \$1,250 depending on purchase.

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier® systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
